BUSINESS SYSTEMS

Neotechnology Amicus for Fuel Outlets:

- Seamlessly integrates bowsers and pumps with store point of sale in a single, reliable system
- Instantly check wet stock levels and sales data for chain sites from a central location
- Simple, robust and easy to use terminal increases speed, efficiency and accuracy
- Highly cost effective allowing any business access to the latest technology

Neotechnology

BUSINESS SYSTEMS

The **Neotechnology Amicus** system for fuel outlets is a reliable and cost effective system for businesses of any size. It will increase the speed, efficiency and accuracy of operations by integrating bowser control, transaction functions and tank monitoring into a single, reliable system.

Designed to unify and simplify, the **Amicus** system also provides sales and performance reporting, stock levels, site monitoring and more, for any number of outlets, from a central location.

Investing in the **Neotechnology Amicus** system is an investment in your businesses future.

"By linking pump control with point of sale, stock control and customer accounts we are able to run our business with great efficiency and can access important information from a single report. The reliability and ease of use mean that our customers are served faster and easier than ever before. We will certainly be using this system when we open up new sites in the future."
